INTRODUCTION

Driven Computer Science (Data Science) student with hands-on experience in cloud technologies, web development, and DevOps, focused on building scalable, secure, and user-centric solutions, with a strong passion for continuous learning and Eager to contribute to real-world projects and grow as a cloud-focused engineer.

EDUCATION

Sri Venkateshwara College of Engineering BE in Computer Science(Data Science) GPA: 8.96/10.0	2022 – 2026
Vidya Mandira Pre University College PCMC - Percentage: 86.66	2020 – 2022

WORK EXPERIENCE

Web Master , IEEE SVCE — Karnataka, India	2024 – Present
• Collaborated with college administrators to resolve website issues and improve UI/UX consistency and usability.	
Web Designer , WEMIT Consultants — Karnataka, India	Dec 2023 – May 2024
• Customized WordPress themes, improved website performance by 40%, developed a billing and in-house management system, and managed social media for consistent brand engagement.	
Intern , Bharat Electronics Limited (BEL) — Bengaluru, India	Jul 2025 – Aug 2025
• Gained hands-on exposure to export manufacturing workflows and project execution within the SBU, recognized for punctuality, discipline, and strong performance.	

KEY SKILLS AREA

Linux

- Configured and managed Virtual Machines through VMware Workstation.
- Space and file management on servers.
- Monitoring servers using ps, top, free commands.
- FTP installation and user management.
- Package management using YUM and RPM.
- Using separate repository server for centralized package distribution.
- Implementing automation using Shell scripting.
- Setting up Cronjobs in servers.
- Creating & managing Logical Volumes (LVM) and file systems.
- Configuring & managing Network services (SSH, FTP, HTTP, NFS)
- Swap memory configuration, Handling remote backups using Rsync.
- Enhanced user security with SUDO.
- Backup & Restore (tar, gzip), Log file monitoring.
- Server connectivity, disk space, CPU, memory utilization monitoring.

Practicals

- Creating virtual private cloud with public and private subnets. and creating a server on both the subnets, accessing private server using public server with the help of NAT gateways by bastion host procedure and hosting a webpage in public server.

AWS

- Creating IAM roles in AWS
- Creating Virtual Private Cloud (VPC)
- Launching EC2 instances
- Creating S3 buckets and enabling versioning
- Knowledge of EBS and EFS
- Creating Load Balancer between servers
- Applying Auto Scaling

DevOps

- Git for version control
- Jenkins as Integration tool
- Continuous Integration & Continuous Deployment.

Practicals

- FTP Configuration:- Using FTP configuration. FTP Master server data saved in Public path Which all Client servers want to access and download (get and put) the FTP master server data they can connect to FTP master sever via ftp.
- NFS configuration:- Using Network file system configuration shared master server drive partition to client servers for accessing the data and writing data.
- Multiple web pages configuration:- Using single server(hostname or IP) configured home webpage and multiple alias webpages and also we can configure multiple webpages on different port as per availability using apache server(HTTP).

PROJECTS

Cloud enabled GPS-Toll Collection

github.com

- To modernize toll collection using GPS and eliminate the need for physical booths.
- Tools Used: Python(Numpy, Pandas), MongoDB Cloud, OSM, API, Geopy,Folium , AWS.

AI-Enabled Conversational Chatbot

github.com

- Developed a chatbot which interacts with people and to the specific domain.
- Tools Used: Python, Visual Studio code, Open CV

IPL-Score-Prediction-with-Machine-Learning

github.com

- Predict the First Inning score of an IPL Match using machine learning algorithms.
- Tools Used: Python(Numpy, Pandas),ML (Algorithms)

UPI Fraud Detection

github.com

- A fraud detection system designed to identify suspicious UPI transactions using data analysis and ML techniques.
- Tools Used: Python, Web Framework

Code2gether

github.com

- A collaborative coding platform that enables real-time code editing and teamwork features for developers.
- Tools Used: Typescript, Web Framework

SKILLS

Technical Skills:

- **Programming:** C, C++ , Python, JavaScript, SQL, HTML, CSS
- **Cloud & DevOps:** AWS, Docker, Jenkins, Git/GitHub, Linux
- **Frameworks:** Flask, WordPress, Figma
- **Databases & Analytics:** MySQL, MongoDB, Power BI, Tableau
- **Core CS:** Data Structures & Algorithms, Operating Systems, Computer Networks
- **OS Flavors:** Red Hat, Ubuntu, Amazon Linux
- **Tools:** Grafana, Putty, MobaXterm, WinSCP
- **Web Server:** Apache (HTTP)

Professional Skills:

- Time Management
- Teamwork
- Problem Solving
- Effective Communication
- Critical Thinking
- Adaptability
- Attention to Detail
- Flexibility

ACHIEVEMENTS

MITE college Workshop

- Led a hands-on “Flask Beyond: Docker to AWS” workshop, engaging participants with practical DevOps concepts and empowering them to confidently apply cloud deployment tools.

Samsung Anveshana

- Participated in the Samsung Anveshana which is a National Exhibition conducted in Bangalore with my team and made to the final round by competing with 400 other participants from different states.

General Discussion

- A GD was conducted in our college with the inter departments of the university and won the first prize in group presentation for our department.

Smart INDIA Hackaton

- A internal SIH was conducted in our college where my team participated and in 18th position out of 80 teams.

College VolleyBall

- Participated in many of the Volleyball tournaments with my college team and happy to say that we have won some tournaments. .
